

Leading Your Business Transformation

The background of the slide features a horizontal band with a blue-tinted image of several business professionals in an office setting. Overlaid on the right side of this band is a graphic of three interlocking white gears. A dark blue horizontal bar spans the width of the slide, partially obscuring the gear graphic.

ISO/IEC 42001 Foundation

1. Course Description:

The ISO/IEC 42001 Foundation training course equips you with the core principles necessary for establishing and managing an artificial intelligence management system (AIMS) in accordance with ISO/IEC 42001. The course is structured to provide you with essential understanding, setting a solid foundation for further expertise in AIMS.

Attending the ISO/IEC 42001 Foundation training course is an important step for professionals seeking to enhance their understanding of AIMSs. This course covers the essential aspects of ISO/IEC 42001, including context understanding, policy establishment, risk management planning, support, operation, performance evaluation, emphasizing the importance of internal audits, management reviews, and continual improvement.

By completing this training course, you will gain valuable insights and be prepared for the certificate exam. The “PECB Certificate Holder in ISO/IEC 42001 Foundation” certificate demonstrates a thorough understanding of the fundamental methodologies, requirements, and managerial approaches essential for an effective AIMS. This credential demonstrates that you possess the professional capabilities to contribute to the enhancement of AI governance and ensure compliance, making it an invaluable addition to your professional qualifications.

2. Audience:

- Professionals seeking to gain a fundamental understanding of the requirements of ISO/IEC 42001
- Managers and consultants seeking to learn more about artificial intelligence management
- Individuals involved in the management or implementation of AI systems
- Individuals tasked with overseeing AI-related projects

3. Learning Objectives:

Upon successfully completing the training course, participants will be able to:

- Explain the fundamental concepts and principles of artificial intelligence management
- Describe the main requirements of ISO/IEC 42001 for an artificial intelligence management system (AIMS)
- Identify approaches, methods, and techniques used for implementing, managing, and improving an AIMS

4. Prerequisites:

There are no prerequisites to enroll in this training course.

5. Educational Approach

- The training course provides both theoretical concepts and practical examples regarding the implementation of ISO/IEC 42001 requirements.
- The training course contains essay-type exercises and multiple-choice quizzes, some of which are scenario-based.
- The participants are encouraged to interact with one another and engage in meaningful discussions.
- The structure of quizzes is similar to that of the certification exam.

6. Course Materials:

You will receive the following as part of this course:

- A copy of the classroom presentation material
- A study handbook containing information and practical examples

7. About the Examination:

The “PECB Certified ISO/IEC 42001 Foundation” exam fully meets the requirements of the PECB Examination and Certification Program (ECP). It covers the following competency domains:

- **Day 1: Introduction to artificial intelligence management system (AIMS) and ISO/IEC 42001**
- **Day 2: Artificial intelligence management system (AIMS) and certificate exam**

After passing the exam, you can apply for the “PECB Certificate Holder in ISO/IEC 42001 Foundation” certificate.

8. Agenda

The ISO/IEC 42001 Foundation exam meets all of the PECB Examination and Certification Program (ECP) requirements and it covers the following competency domains:

Domain 1: Fundamental principles and concepts of an artificial intelligence management system (AIMS)

Domain 2: Artificial intelligence management system (AIMS)
